

CNC TURNING & MILLING

PROTOTYPE / SHORT RUN
PRODUCTION

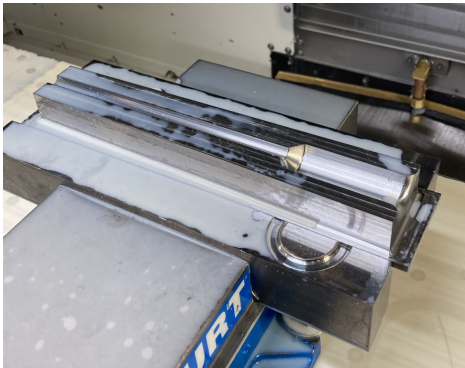

Precision parts. Practical manufacturing experience.

Custom machined components in alloy steel, stainless, aluminum and plastics.

4140 PRE-HARDENED STEEL

Crankshaft | Off-center turning & keyway milling

CONTOUR MILLING

3D surfacing

316 STAINLESS STEEL

Grooving & internal profiling

1018 STEEL

Profile turning & threading

CAPABILITIES & SERVICES

Turning, boring, threading & grooving
3-axis milling, drilling & tapping
Manufacturing consulting & drafting

MATERIAL EXPERIENCE

4140 / 4340 heat-treated steel, stainless & Inconel
Aluminum, carbon steel, copper, brass & bronze
Titanium & machinable plastics

WORK CAPACITY

Turning: up to 8" diameter x 20" length
Long shafts: up to 56" long at 1.60" dia. or less
Milling travel: 30" X x 20" Y x 16" Z

Capacity depends on geometry and workholding.
